## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group I, claims 1-7, in the reply filed on March 12, 2007 is acknowledged. The traversal is on the ground(s) that "the simultaneous search for both groups is believed not to constitute an unreasonable search for Patent Examiner" and that "a method and a corresponding device for caring that method are considered to comply with the requirements." This is not found persuasive because Election/Restriction requirements were made on the basis of two different inventions, which are not related to each other, not on the basis of the abovementioned applicants' arguments.

Examiner agrees that method and corresponding device for caring out that method can be considered as one invention, if both, the device and the method have the same modes of operation, or functions, or effects. It is not the case in the subject claim groups. Applicant(s) claim two patentably distinct inventions as was defined in the prior Office action.

Examiner understands that applicant(s) disclose only one power generating system, but they claim two different control schemes from this system with clearly distinguishable control features. Specifically, for example, Group II has the following features, which are not present in Group I of claims:

- "regulated in accordance with the slip",
- "adaptation to reactive power",
- "circuit capacitors",

Art Unit: 2834

-- "disposed in a gondola",

-- "synchronized",

-- "slip resistor",

etc.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 8-16 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention with traverse.

### ***Specification***

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.

Art Unit: 2834

- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

### ***Claim Objections***

4. Claim 1 is objected to because of the following informalities: Claim 1 is not written according to MPEP requirements, because the preamble and the body of the claim are not distinguishable, which make claim 1 open to numerous interpretations about the specificity of the claimed subject matter. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

6. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Art Unit: 2834

Regarding claims 1 and 3, the phrase "preferably" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Regarding claim 1, the phrase "directly or indirectly" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "directly or indirectly"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

In claim 1, words "converter" and "rectifier" appear to describe the same feature, which makes this feature (super-synchronous cascade) indefinite.

Claims 2 and 4-7 are indefinite because they depend on the rejected claim and do not correct the noted problem.

### ***Conclusion***

7. When the claims are amended, applicant(s) should state in detail where in the original disclosure or in the drawings the amended features find support. No new matter may be introduced.
